Profile Summary

Freelance-ready Data Analyst / Data Scientist with hands-on experience in **Python, SQL, Tableau, and Power BI**. Skilled in **data cleaning, exploratory data analysis (EDA), visualization, and statistical modeling**. Experienced in building dashboards and reports for actionable business insights. Strong communication and collaboration skills; open to **remote/freelance opportunities** in data analytics, BI, or Python development.

Technical Skills

- **Programming & Data Handling:** Python, SQL, Pandas, NumPy, Excel, SQLite, MySQL
 - **Visualization & BI:** Tableau, Power BI, Matplotlib, Seaborn
 - **Analytics & ML:** Exploratory Data Analysis, Statistical Modeling, scikit-learn
 - **Web & Tools:** Flask (basic), REST API, JSON, Git, GitHub, VS Code, Jupyter Notebook
 - **Other:** Dashboards, Data Cleaning, CRUD operations, Agile basics
-

Professional Experience

Data Analyst Intern – Arcatron Mobility Pvt. Ltd. | May 2025 – Aug 2025

- Built **interactive dashboards** using Tableau, Power BI, and Excel.
- Performed **data cleaning and exploratory analysis** to generate actionable insights.
- Automated data collection & reporting workflows for faster decision-making.
- Supported cross-functional teams with **data-driven recommendations**.

Trainee (Data Scientist) – Flynaut SaaS Pvt. Ltd. | Oct 2024 – Aug 2025

- Completed structured training in **Python, SQL, and Machine Learning**.
- Assisted in **data workflows and analytics processes**.
- Worked on practice datasets and team projects for skill enhancement.

Data Science Intern – Radiant IT Services Pvt. Ltd. | Feb 2024 – Aug 2024

- Preprocessed datasets using **Python & Pandas**.
 - Built predictive models for **rainfall prediction** using scikit-learn.
 - Visualized insights with **Matplotlib and Seaborn**.
 - Collaborated with the team to improve **workflow and reporting efficiency**.
-

Key Projects

Rainfall Prediction (ML Project) – Python, scikit-learn, Matplotlib

- Developed classification models to predict rainfall patterns; visualized insights.

Sales Dashboard – Tableau, SQL

- Designed interactive dashboards with KPIs for sales data using SQL-preprocessed datasets.

Student Result Management System – Python (Tkinter + SQLite)

- GUI-based CRUD application for managing student results.

Portfolio Website – HTML/CSS

- Hosted on GitHub Pages to showcase projects and dashboards.
-

Education

B.E. in Computer Science – Sir Visvesvaraya Institute of Technology, Nashik (SPPU)

2019–2024 | CGPA: 7.05/10

Certifications

- Python for Everybody – Coursera
 - SQL Basics – HackerRank
 - Data Visualization with Python – IBM (Coursera)
 - Tableau for Beginners – Internshala Trainings
 - Statistical Modeling – Great Learning
 - Google Analytics Fundamentals – Google
 - MySQL & PostgreSQL – Udemy
-

Strengths

- Fast learner & self-motivated
 - Strong analytical & problem-solving skills
 - Effective communicator & team player
 - Detail-oriented with focus on actionable insights
-

This version is:

- **One page**, ATS-optimized with **keywords from the JD** (SQL, Python, Tableau, Power BI, dashboards, EDA, analytics).
- Highlights **freelance/remote readiness** in Profile Summary.
- Projects are concise and demonstrate relevant skills for freelance work.
